Flu Vaccinations in the Workplace

Workplace flu vaccinations make sense for any organisation. Doctorcall offer cost-effective flu jabs for businesses of all sizes, to reduce the risk of absenteeism during the flu season.

Established in 1989, Doctorcall has vaccinated more people against influenza than any provider outside the NHS. With our experience, we can provide advice and recommendations to your organisation. We recommend that you book early to secure a preferential booking and early bird rates. You can place your order even if you do not yet know the number of staff who will require a flu vaccination.

Flu vaccinations are proven to reduce absence, so they more than pay for themselves in an average year. In addition, as part of your disaster recovery and pandemic contingency planning, they help protect against significant disruption to your organisation and your services. Influenza vaccination is also a popular staff benefit and provides duty of care.

We start our programme at the end of September and dates are offered on a first-come-first-served basis.

Contact us today for a quotation and availability.

Quadrivalent Influenza Vaccination

Doctorcall offers the quadrivalent flu vaccine - a superior vaccine which means that each patient will be protected against more strains of flu than ever before, as recommended by the World Health Organisation and Public Health England.

Doctorcall can offer the quadrivalent vaccine at a cost-effective price and we do not believe it is any longer appropriate to offer trivalent vaccine.

Why Choose Us?

Cost

We aim to offer the best value for money in the market for workplace flu jabs. If you receive a lower quotation from another provider, please let us know and we will endeavour to match it.

Flexibility

We offer highly competitive prices with uncompromising standards. Our fully qualified nurses will attend your workplace to vaccinate your staff at a time that suits you, 7 days a week, at any time of day.

Experience

We provide flu jabs to more than 700 businesses nationwide, vaccinating their staff against seasonal influenza. We were the first medical provider to work with major pharmacy chains like Tesco, Lloyds Pharmacy, Superdrug and more, and we helped them to offer vaccinations direct to the public through their retail outlets.

Availability

On-site flu vaccinations are generally available every day with a good deal of flexibility. We will work closely with you to pick the day and time that best suits your needs.

We have good coverage across Great Britain, including many remote areas.

We do everything for you

We come to you, so there is no need to send your employees off-site for their flu jabs. This keeps things simple, avoids inconvenience, and saves staff time.

We help you communicate the programme to your staff; we deliver absolutely everything that is required; and we remove all waste at the end of the programme. We can even provide a booking system so your staff can book their vaccination time and do not need to queue.

All you need to do is to book the date.

Vouchers

We also offer flu vaccination vouchers.

These are ideal for field-based workers, staff who cannot attend on the day of the on-site vaccinations or where it is not feasible to have a nurse attend the business. Vouchers can be redeemed at over 3,000 pharmacies and retailers nationwide in exchange for a vaccination.

The price is often lower than most pharmacies' retail prices.

Vaccinations are carried out by experienced Doctorcall nurses at your premises.

Flexible bookings, 7 days a week, with a booking system for your staff.

Flu Vaccination Vouchers for smaller organisations or staff unable to attend on-site.

Reduce the effects of absenteeism and give your staff a valuable added benefit.
